Assignment

1. Write a programme to generate 9's table.
2. Create an array of 10 integers and print only the even values.
3. Create an integer array of m rows and n columns (where $m, n < 10$) and print only the odd values.
4. You need to print integers till 20, which loop construct is the best for this?
5. Create 2 integer matrices of m rows and n column each and add these 2 matrices.
6. For the above problem add the relevant code to check valid inputs. Hint: To add matrices they must be of equal dimension. **[Solution not provided for this one]**
